Visual Enterprise Architecture

See your business right

VEA believes strongly in the power of client teams and the ability to deliver value and results within an organization. The goal of Knowledge Transfer is to train and communicate our experience and best practices to your teams by providing results-oriented training. This guarantees that team members can begin to use the ARIS Platform as quickly and effectively as possible. We establish short and long-term training goals and work with your organization to deliver knowledge as effectively as possible.

KNOWLEDGE TRANSFER

Training for Results

VEA believes strongly in the power of your client teams and their ability to deliver value and results for your organization. Our knowledge transfer services are designed to implement your platform with training to communicate the best possible practices to your team.

We deliver training for the following tools:

- ARIS Business Designer/Architect
- ARIS IT Architect
- ARIS for SAP NetWeaver
- Oracle BPA Suite

VEA also provides the following services:

- Business Process Performance workshops
- Enterprise Architecture workshops
